SkyGWO FXO Gateway — *Skype gateway for PBX extension lines or Carrier lines*

Features

- **Support Work From Home during COVID-19. Office calls will be forwarded to employee's mobile phone Skype for free**
- **Provide free internal voice communication for enterprise and enable free mobile office communication for employees by leveraging free Skype cloud service**
- **All enterprise offices use the same phonebook for Skype gateway and worldwide employees can call different offices using the assigned extension numbers**
- Employees out of office can call back office via landline or mobile phone and then make Skype/SkypeOut™ to customers (like Skype To Go Service with more flexibility)
- Employees out of office can call back office via Skype to reduce high mobile phone fee or international roaming fee.
- Make Skype calls through office extension phones. No need of microphones, speakers and Skype for every employee's PC
- One PCI-E card supports four independent Skype lines and up to 16 Skype lines are supported at one system
- Make a Skype World subscription program at USD $13.99 per one month and you can call 63 countries for 10000 minutes within one month
- Three kinds of call out control methods
- One unique corporate Skype account/SkypeIn™ number for call in
- Support Speed Dial (up to 20 digits) for Skype/SkypeOut calls or direct SkypeOut calls for regular phone numbers
- Support one Speed dial for a Skype or a SkypeOut call with extension number auto-dial
- Support DID(Direct Inward Dial): After DID function is integrated with free Skype Button or cheap SkypeIn service, Skype or SkypeIn incoming calls can be forwarded directly to assigned office extensions for customer support without accessing company PBX IVR. It can replace the expensive 0800 call service
- DOD (Direct Outward Dial): With the DOD feature, employees can just dial an extension number to reach a foreign factory or a remote office
- Support public and private phonebook

- Default speed dial number "999999" for free Skype Echo123 test
- Default speed dial number "999998" for recording voice as a customized wav file like company welcome IVR
- Support popular PBXs
